DATE

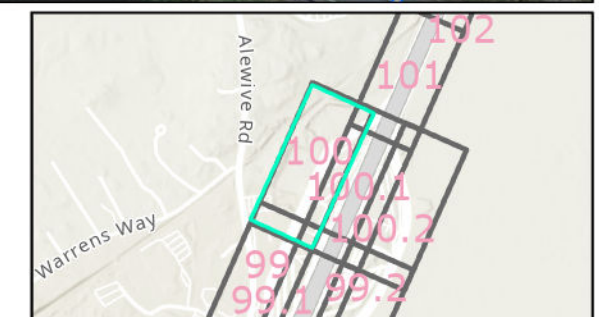

Notes:

1. All trees, down timber, brush, bushes, shrubs, plants and debris not designated to remain shall be removed from the clearing areas shown on these plans.
2. All stumps, whether existing or resulting from the clearing operation, that are located within the roadway clear zone or within areas that can be mowable after clearing operations are completed, shall be ground flush with the surrounding grade. All other stumps shall be cut as close as practicable to the surrounding grade, maximum height of 2-inches.
3. Stumps located in back slopes and within 15-vertical feet of the ditch line shall be ground flush.
4. Contractor shall take all precautions to protect traffic from flying debris generated by the operation.
5. All vegetated areas to remain that are damaged by the clearing operation shall be repaired at no cost to the Authority.
6. Mechanized clearing operations shall maintain a 25-foot setback from all streams and sensitive environmental areas.

2. All stumps, whether existing or resulting from the clearing operation, that are located within the roadway clear zone or within areas that can be mowable after clearing operations are completed, shall be ground flush with the surrounding grade. All other stumps shall be cut as close as practicable to the surrounding grade, maximum height of 2-inches.
3. Stumps located in back slopes and within 15-vertical feet of the ditch line shall be ground flush.
4. Contractor shall take all precautions to protect traffic from flying debris generated by the operation.
5. All vegetated areas to remain that are damaged by the clearing operation shall be repaired at no cost to the Authority.
6. Mechanized clearing operations shall maintain a 25-foot setback from all streams and sensitive environmental areas.
